## ProMix II, ProMix Auto Product Obsolescence

Graco has completed the release of the new ProMix 2KS platform of electronic proportioning equipment. These systems offer enhanced features and capabilities over the ProMix II and the ProMix Auto family of proportioners.

Graco will discontinue the manufacturing of the ProMix II and Auto systems on August 1, 2009. We have a limited supply of these obsolete systems available for purchase on a last time buy. The following base systems are available while supplies last:

<u>Part Number</u>	<u>Description</u>
PM1100	ProMix II, G3000 Meters A and B
WP1000	ProMix Auto, G3000 Meters A and B, no flow control

Each system can be ordered to include accessory kits for color valves or different meter options.

After August 1, 2009, replacement parts for the ProMix II and Auto systems will continue to be available. Please contact your local Graco Finishing account manager with any questions.

Best regards,
